Interior Shutters

Styles and shapes to give you perfect control of your light and privacy

A choice of four louvre sizes will help match the look of your room.

Full height style shutters cover the entire height of the window producing a simple and elegant effect.

Tier on tier offers the versatility of separate shutters on top of each other. Each opens individually for the ultimate light and privacy control.

Café style cover the bottom part of the window, leaving the top uncovered, perfect for overlooked windows whilst allowing natural light to flood the room.
